

Compressor Preheater Type SAN-CPH

- Quick and easy installation
- Silicone insulated heating element
- Tinned copper braid for mechanical protection and earthing
- Completely moistureproof
- Special dimensions on request
- CE marking
- UL heaters on request

Applications:

For use on air conditioners and refrigeration compressors to prevent the absorption of refrigerant into the oil. The lower the temperature is, the faster and the more complete is the absorption. This will cause severe damage when the compressor starts due to lack of lubrication.
Machine construction, plastic materials industry, hotplates.

Item	Range min (mm) to max. (mm)	Wattage (W)	Voltage (Volt)	Earth connection
SAN-CPH	480-580	35	230	II
SAN-CPH	560-800	40	230	II
SAN-CPH	610-840	45	230	II
SAN-CPH	620-800	45	230	II
SAN-CPH	550-650	50	230	II
SAN-CPH	685-870	54	230	II
SAN-CPH	620-870	55	230	II
SAN-CPH	640-825	60	230	II

Technical Data:

OverjacketSilicone
 Connection two-end sleeveless cold connection cable
 Length of cold connection cable 0.80m
 Protection class: II
 Voltage 230V
 Note:different voltage and output stages are available on request
